BENJAMIN AKINGBADE

Data Analyst | Machine Learning

ja.akingbade@gmail.com • linkedin.com/in/benjamin-akingbade-306022251 • ja-akins.github.io/benjaminakingbade.github.io

PROFILE SUMMARY

Data Analyst with hands-on experience in data analysis, reporting, KPI tracking, and dashboard creation. Proficient in **SQL, Excel, Python, Power BI, Tableau** and **scikit-learn** for analysing datasets, building machine learning models, validating data accuracy, and identifying trends. Strong ability to translate complex analytical findings, including **supervised ML pipelines achieving 98.2% accuracy,** into clear, actionable recommendations that support stakeholder decision-making and business performance. Committed to rigorous, ethical, and interpretable data science practice.

SKILLS

Data Analysis	Dataset analysis, trend identification, KPI tracking, data validation, EDA
Machine Learning	scikit-learn · Supervised classification · Decision Trees · KNN · Feature engineering · Model evaluation (precision, recall, F1, confusion matrix) · Overfitting diagnostics
Python	pandas · NumPy · matplotlib · seaborn · scikit-learn · Jupyter Notebook
SQL	SELECT queries, JOINs, GROUP BY, CTEs, window functions
Excel	Pivot Tables, IF, COUNTIFS, VLOOKUP/XLOOKUP, data cleaning, automation
BI & Visualisation	Power BI, Tableau: dashboard creation, reporting, KPI tracking
Soft Skills	Analytical thinking, stakeholder communication, ethical AI awareness, attention to detail

PROJECTS

Supervised Weather Classification System: European Climate Prediction *2025*

Client: ClimateWins, a European climate nonprofit focused on extreme weather event prediction
Stack: Python · pandas · NumPy · scikit-learn · matplotlib · seaborn · Jupyter Notebook · ECA&D Dataset

- Built an end-to-end supervised binary classification pipeline achieving **98.2% test accuracy,** 21.8 percentage points above the majority-class baseline, using Python and scikit-learn on 10 years of ECA&D; weather data (3,653 daily records across 18 European stations).
- Reduced dangerous false positives by **82%** through model selection: Decision Tree classifier (8 false positives) vs KNN (45 false positives), directly addressing the organisation's primary safety risk of falsely labelling dangerous days as safe.
- **Delivered a fully interpretable, zero-overfitting model** (Decision Tree max_depth=4; train/test accuracy gap: -0.4%), enabling stakeholders to audit every prediction through a visible, explainable decision path, meeting an explicit interpretability requirement.
- **Engineered a chronological train/test split** (2000-2007 train / 2008-2009 test) to prevent temporal data leakage, the critical methodological decision for time-series weather data with strong autocorrelation.
- **Performed feature selection** on a 165-column dataset, reducing to 5 validated predictors using Pearson correlation analysis and multicollinearity assessment.
- **Produced a 10-slide stakeholder presentation** translating ML findings into actionable business recommendations for non-technical leadership, plus a formal ethical analysis covering proxy label risk, temporal bias, and automation governance.

WORK EXPERIENCE

Data Analyst / Business Analyst | ***FegoBit Tech Solutions*** *2024 – Present*

Intern to Full-Time progression

- Analysed business and operational datasets (300+ records) to identify trends, inefficiencies, and improvement opportunities; communicated findings to stakeholders across 3 teams.
- Produced weekly and monthly management reports using Excel, SQL, and Power BI, supporting decision-making for operations and planning teams.
- Designed and maintained Power BI and Excel dashboards tracking 8-12 KPIs, improving visibility into performance and operational metrics.
- Conducted customer and product data analysis to support planning, optimisation, and retention-related decisions.
- Reduced manual reporting effort by approximately 15-20% through data cleaning, standardisation, and Excel automation.
- Collaborated with stakeholders to translate business questions into clear analytical insights and actionable recommendations.

EDUCATION

Bachelor of Technology (B.Tech), Industrial Chemistry *2021 – 2026*

Federal University of Technology, Akure, Ondo State

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Machine Learning with Python *2025*

CareerFoundry: Supervised and Unsupervised Learning

- Supervised classification (Decision Trees, KNN), feature engineering, model evaluation
- End-to-end ML pipeline: EDA, preprocessing, feature selection, modelling, stakeholder delivery

Data Analytics & Business Intelligence *2024 – 2025*

Alex The Analyst

- SQL for data analysis (joins, CTEs, window functions)
- Excel for data cleaning, analysis, and dashboards
- Python for data analysis (pandas, exploratory analysis)
- Portfolio-based analytics projects
